AGATA

Audio and video receivers with handset on wall

Agata is the line of new generation audio and video receivers with handset, in colour or B&W, with Basic or Building functions. All coupled with great ease of use, functionality, clarity of the lines of the design and continuity of style with the other Bpt new generation models. It takes just one look to see that Agata has all the qualities to win you over.

- 3.5" LCD display (colour or B&W)
- Installation on the wall with special support

Functions

- Door lock release
- Self-connection of video from entry panels, with cyclic selection
- Ring tone disabling, with indicator light
- Video switching function (video version)
- Colour adjustment (colour video version)
- Brightness adjustment (video version)
- Ringtone volume adjustment
- 2 controls for activating auxiliary functions
- Master/Slave Function

EXTRA FUNCTIONS IN BUILDING VERSION:

- 8 intercom calls for version VC/B and 10 for version C/B
- "Panic" button to call the Porter for assistance

In the case of simultaneous calls, the audio/video conversation is operative on the receiver from which the user replies to the call, whether this is the main (Master) or secondary (Slave) unit, without the need for a new power supply or supplementary wiring.
