# sol

## 100% WIRELESS ALL-IN-ONE MODULAR SYSTEM.

Sol is Inim's new all-in-one completely wireless professional system. A modular control panel that allows you to manage up to 60 wireless devices, by simply adding optional external modules. Sol is a top design easy-to-install system that satisfies all needs.

## SIMPLE FROM THE START.

Worry free. Activating Sol is amazingly simple and fast. You can thank the simplified installation procedure for that. The on-board **QuickGO** technology. The InimTech Security app that allows quick trouble-free programming of wireless devices and the setting up of small scale installations in record time.

## MODULATED TO SUIT YOUR NEEDS.

Expand your desire for connectivity. The Sol control panel has a plastic enclosure with room for numerous optional modules with HotStart installation capabilities for the advanced connectivity. Sol is connected to the Inim Cloud and offers installers and users complete information and easy single-touch command activation via app or the Cloud.

## THE ESSENCE OF DESIGN.

The Sol control panel has an aesthetically refined minimalist design that blends in seamlessly with all types of decor. An ideal solution for the protection of small residential and commercial buildings, but also for more complex installations. The Sol control panel is available in a wide range of versions.

**QuickGO technology**  
Quick installation and programming. InimTech Security installer app with QR-codes enrollment.

**DoubleLink Technology**  
Two-way wireless transmission.

**INIM Cloud**  
INIM Cloud connectivity management notification and installer

## Technical specifications

### Control panel
