-------------------------------------	---------------------------------------	--

## Principle of operation

The device controls the security modes and sends an alarm signal to the Central Monitoring Station by pressing the buttons on the key fob.

## Features

Authentication prevents replacement of the device and false alarms.

## Installation and set up

Ready to operate straight out the box: the battery is already installed, therefore there is no need to disassemble the detector. With one click, it can be connected to the hub in the mobile application.
