

QR Code Reader

ER80 QR Code Access Card Reader is our new intelligent Access Card Reader, Fast reading speed, High recognition rate, Strong compatibility, can connect to any Wiegand input controller, widely used at Office access management, Tourism management, Community visitor access management, Administration Service Hall management, Gates access control, Visitors intelligent machines, Smart home; Upgrade old access control systems etc.

QR Code Reader Technical Parameter

| | |
|-------------------------|---|
| Size (L*W*H) | 86*86*42mm |
| Material | Case: PC Identify panel: tempered glass |
| Interface | Wiegand26、34、RS485、RS232、USB、TCP/IP optional |
| Decoding support | QR code、one dimensional code |
| Voltage | Support 4-15V Wide voltage input |
| Current | 800mA |
| Reading directions | Camera centric slant 45° |
| Reading speed | <200ms |
| Reading range | 0-20CM |
| Reading feature | auto-induction, beep hint |
| Light source | With LED light source itself, anti-highlight interference |
| Decode Mode | Image decoding |
| Application environment | Temperature: -20~70°C Humidity: 10%~90% |
| Operate system | Windows(xp 7 8 10)、Linux |
| Indicating status light | Red-Work、Green-Feedback、Light Green-Internet |
| Reading range | 3-6CM |
| Reading card type | EM or Mifare card |

Restore Factory Settings: Use sharp objects inserted into REST hole of QR code reader backside, release till the QR code reader automatically restarted.

Features:

- 1.DC 12V 1000MA
- 2.EM card or Mifare Card for choose
- 3.Identify paper or screen QR Code
- 4.Support 26/34 weigand output to third party Access Control system
5. RS232, RS485,USB virtual keyboard, USB virtual Serial port, HTTP output, MQTT output optional

Identify QR code Size: 8-100mm

Wire connection:

VCC: DC12; GND: DC12; D0:DATA0; D1:DATA1; LED:LED indicate;
BEEP:Sound ;

TX/R+:RS232+/RS485+;

RX/R-:RS232-/RS485-;

SPK-, SPK+: not define;

RJ45: connect to network, PC software setting reader parameter; apply to HTTP mode

micro-USB: For USB virtual keyboard and USB virtual serial port mode communication.

Note:

- 1: do not connect the power to the SPK+ and SPK- ports;
- 2:Wiegand output, QR code shall comply with the principle of combination of 16 hexadecimal number 0~F, the QR code in accordance with this principle can heard a Beep, controller can receive the card data; QR code not in accordance with the principle can heard two beep, the controller can not receive the card data;
- 3: Wiegand output, scanning QR code take number principle is high before, QR code automatically identified as 16 decimal;
- 4: WG34 output, QR code card number must be 4 bytes, insufficient in high fill 4 byte number with 0.
