

## Compression spring hybrid - heavy tension

### ES-CNT3HB

This compression spring hybrid tensioners combines a compression spring and a tensioner all in one. The compression spring will maintain the tension of the fence wire and the ratchet tensioner can be used to increase the tension as and when required over time.

#### Features:

- Heavy duty durable design
- Combination of a compression spring and tensioner
- Hardy glass filled nylon ratchet
- Plastic inner which eliminates galvanic reaction
- Stainless steel spring for long life 15kg tension
- Wire diameters from 1.6mm to 2.0mm

#### Specifications:

Material: Stainless steel and UV stabilised nylon inner.

Glass filled nylon spindle

Spring tension maximum: 15kg

Operating temperature: -40 to 80 Celsius

Operating voltage: 0- 12KV

Recycling: SPI resin code 7
