

Compression spring hybrid- medium tension

ES-CNT2HB

This compression spring hybrid tensioners combines a compression spring and a tensioner all in one. The compression spring will maintain the tension of the fence wire and the ratchet tensioner can be used to increase the tension as and when required over time.

Features:

- Heavy duty durable design
- Combination of a compression spring and tensioner
- Plastic inner which eliminates galvanic reaction
- Stainless steel spring for long life 8kg tension
- Wire diameters from 1mm to 1.6mm

Specifications:

UV stabilised Nylon
Stainless steel spring
