

B-RED

2-Wire 2-Button Audio Handset

The kit allows you to create an audio entry system with up to two calls with secrecy of speech intercom function and the option to expand the system by up to 4 internal handsets. Two wires include inter-communication and door release function.

TECHNICAL CHARACTERISTICS

The audio handset has two buttons, one to open the door and the other for an additional function.

The entry panel is surface mount with an aluminium face plate, it has a dual call button. The call button is back-lit with a green LED.

The kit includes:

- A handset with 2 buttons, one to trigger a striker lock/activate a gate etc and the other for additional function. Possibility to reduce the call volume.
- An entry panel, surface mount, with a single push button which enables you to serve 1 or 2 residences. The call button is backlit with a green LED.
- A small power supplier, equipped with a rectifier that provides continuous voltage 18V-9VA and it is thermally and electronically protected against overload and short circuits.

Features of the B-red Kit:

- **FLEXIBLE:** the 18V power supply can be connected directly to the entry panel or to the handset inside the house.
- **EXPANDABLE:** it is possible to add handsets up to the maximum of 4 and expand the installation in a single dwelling or in a semi-detached house.
- **INTER-COMMUNICATION:** the Kit offers the inter-communication feature between internal extensions, either all together or in two groups as in a semi-detached house or apartments, with secrecy of speech without requiring any additional wiring or accessories.

Max Distance between Entry panel & Handset

| Wire cross section | Max distance |
|-----------------------------------|--------------|
| >0.22mm ² Twisted pair | 100m |
| 0.5mm ² Twisted pair | 150m |
