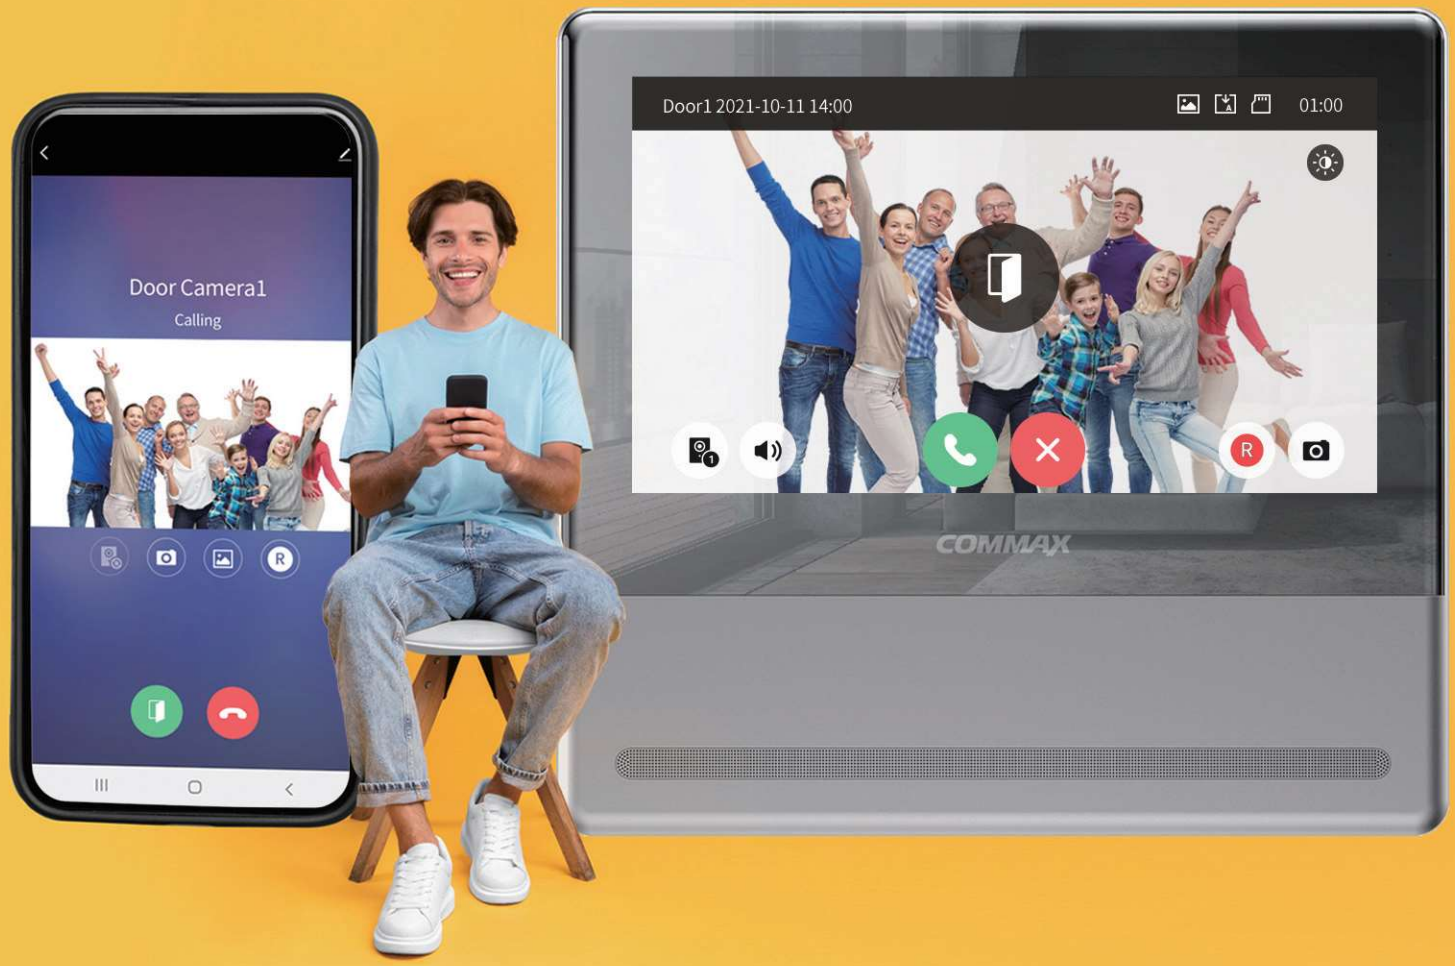
PRODUCT DESCRIPTIONS

On the monitor and on my smartphone

Find the most convenient way to find out who came to our house, such as courier, delivery, and customers!



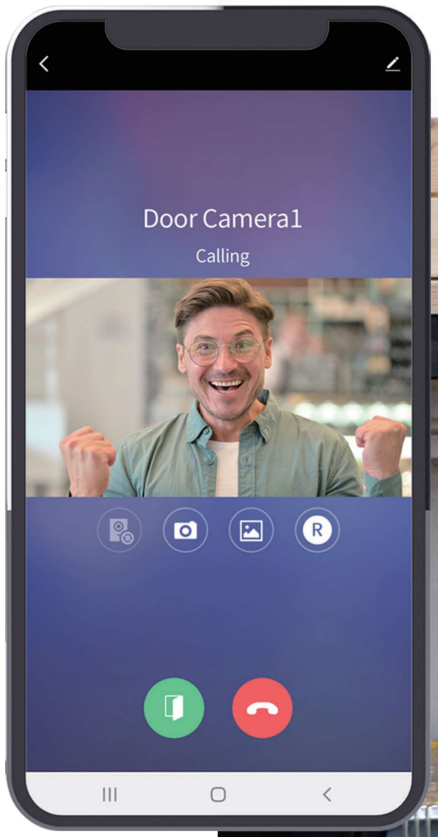
What if someone comes when I’m outside?

Have you ever thought that it would be great if you could check with your smartphone when someone came?

There is a smart monitor that connects to your smartphone.

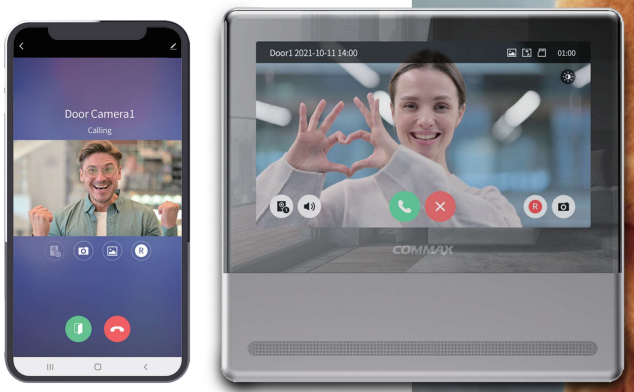
The monitor CDV-70QT that can check who is coming and makes a call with a smartphone on inside and outside the house!

You can talk to your visitors when you are outside



You can talk to your visitors when you are at home

Whenever where you are, you can talk to your visitor and open the door



You can check when guests arrive and open the door without having to go the front door.

Just touch it.
Instead of sharing that password.
Now you can open the entrance door with a touch.

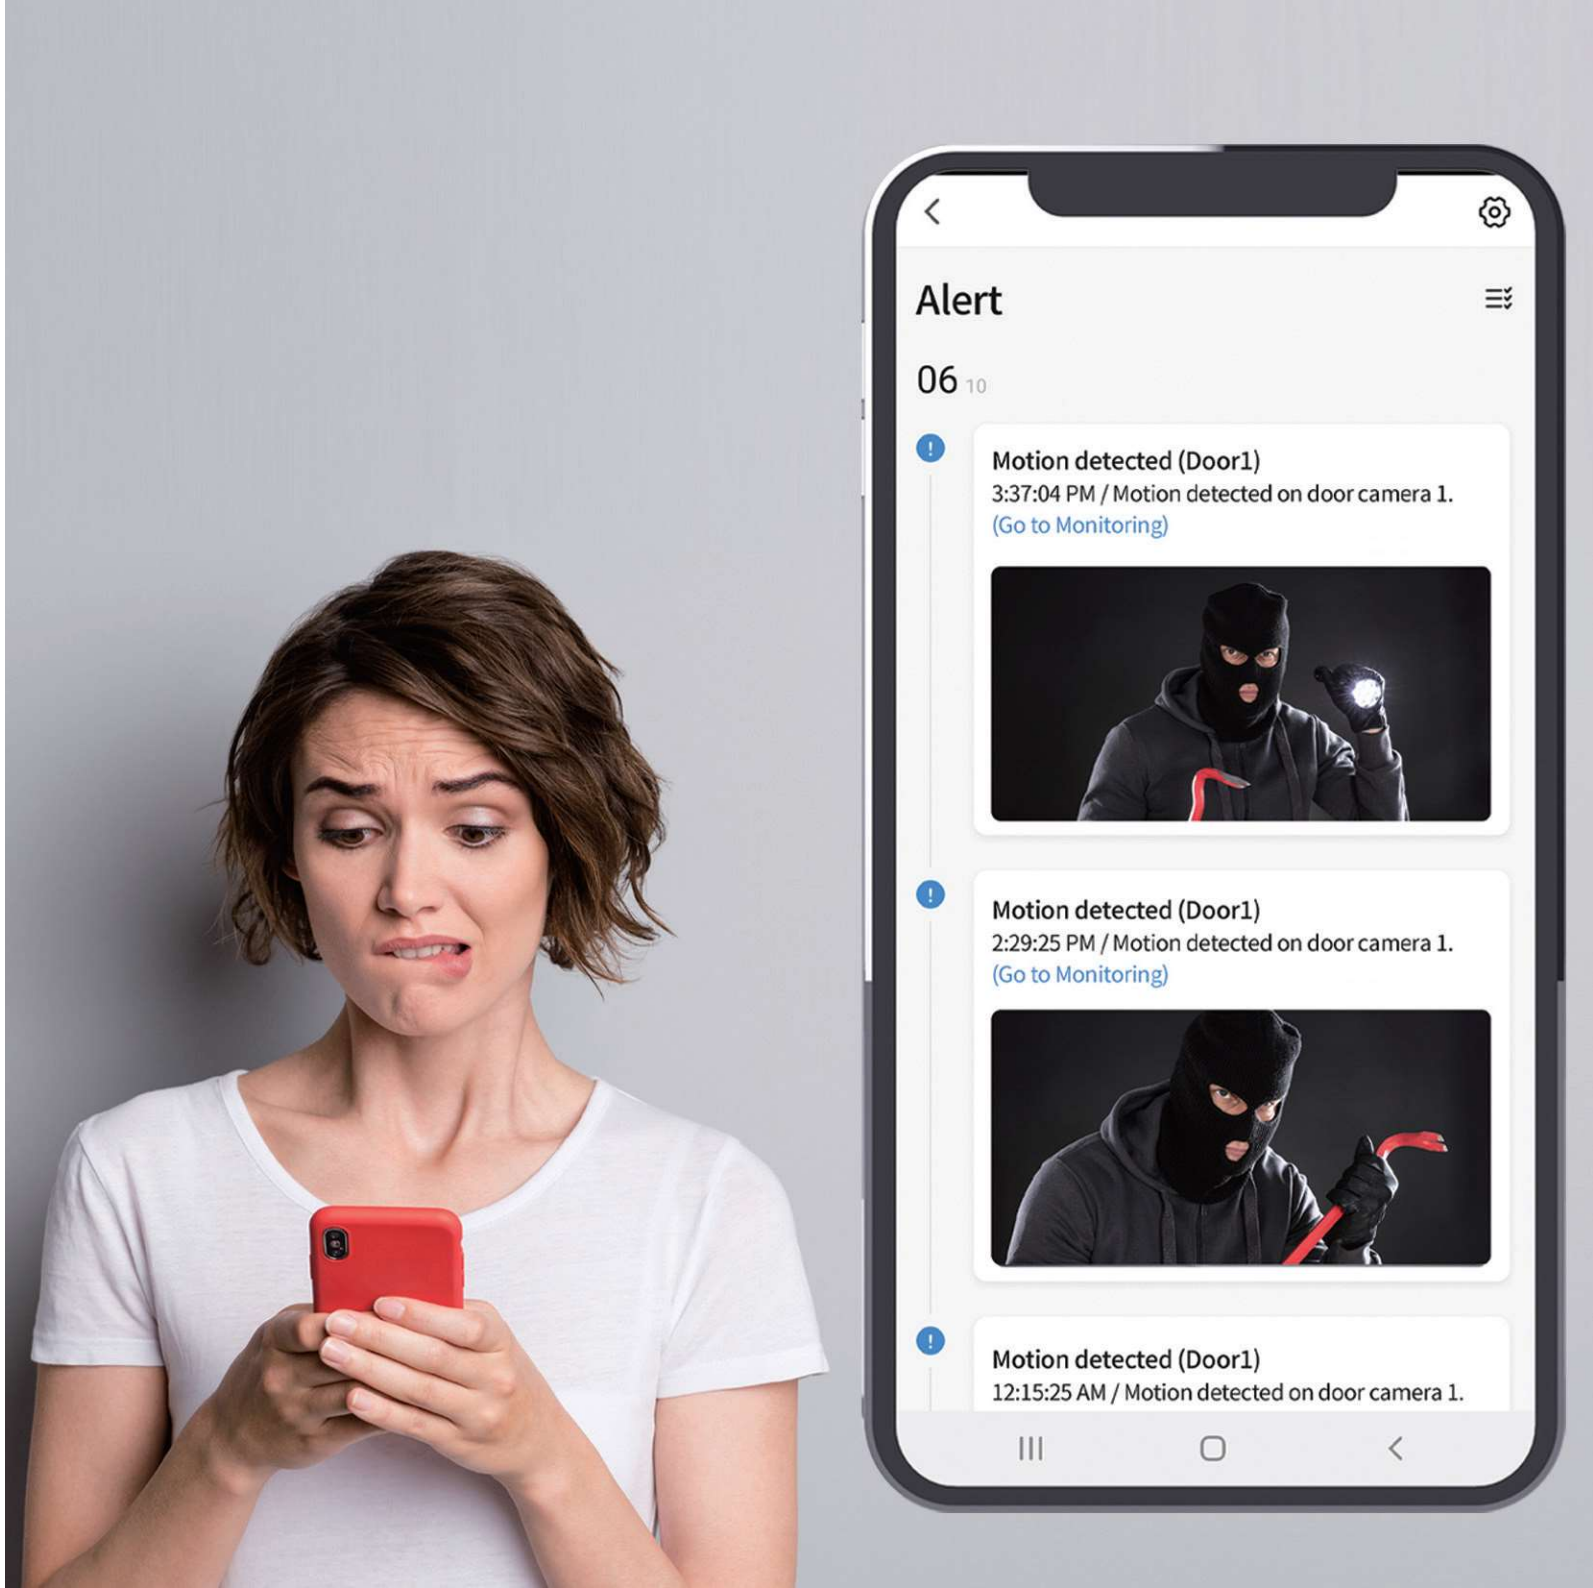
(RF-447 module interworking option)

Automatically save images even if someone is standing in front of your house!

If there is someone in front of your house, photos and videos are automatically saved even if do not push the doorbell.

Check
with your smartphone even when a suspicious person is in front of your house!

If a suspicious person is in front of the house, you can check the front of the house with a smartphone and prevent crime.



Perfect security without blind spots through CCTV interworking!

It makes our house safer by minimizing blind spots by monitoring from the front door to the back door by interlocking two CCTVs with a door camera.

Conveniently anywhere you want!
(2monitors + smartphone interlocking)

Tired of going to the living room?
Connect one more to the living room
as well as your bedroom
check it out in clearer picture quality!
