

Cable HT tinned copper S-series

The S-Series high voltage cable is used as a lead out cable from your energizer to the fence and for all other insulated high voltage transmissions. These high voltage cables can be used with all the Nemtek galvanised wires. They are available in single core or multi core contraction.

Features

- Slimline designed for ease of installation and an aesthetically pleasing look
- Cable is made up of tinned copper stranded wires for more flexible and ease of use
- The multi core S-Series reduces installation time

Specifications:

Material: UV stabilised double insulated
Tinned copper stranded wires
