

FLIR M400 Series

M400/M400XR LONG-RANGE HIGH-PERFORMANCE MULTI-SENSOR SYSTEM

PREMIUM MULTI-SENSOR THERMAL NIGHT VISION

The M400 and M400XR's advanced 640 x 480 sensor delivers crisp thermal video images in total darkness and lowlight conditions. Both models feature an integrated near-infrared HD color visible camera, and tight-beam LED spotlight for augmenting target identification. A continuous optical, thermal zoom lens with 4X magnification allows operators to see other vessels and targets at longer ranges. Active gyro-stabilization ensures a steady image in rough seas. Designed for first responders, the M400XR model adds target video tracking, plus fire-fighting mode. The M400XR's fire-fighting mode provides an isothermic color palette and spot temperature display to help pinpoint trouble areas through smoke and steam.

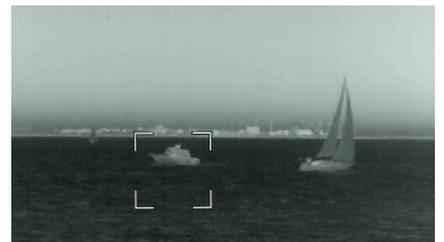

LONG RANGE DETECTION

- Optimized for long-range detection with 4X optical, thermal zoom
- Active gyro-stabilization provides a steady view in rough seas
- Enhanced awareness and low light detection with 30X high definition visible camera

M400XR FIRE FIGHTING MODE

- Engineered for first responders encountering vessels in distress and shoreside fire scenes
- An isothermic color palette instantly reveals fire and hotspots through smoke and steam
- On-screen temperature display helps pinpoint trouble areas

M400XR VIDEO TRACKING

- Designed for surveillance operations, video tracking allows the crew to monitor a target of interest
- Video tracking keeps the M400XR pan and tilt locked on any target using both visible or thermal cameras.
- ONVIF compatibility and IP video enables integration with NVRs and Network Video Management systems
