Pan & Tilt Smart Home Camera

Fully-covered protection with added smartness

The latest H6c Pro makes your indoor security easier and smarter with less hassle. Ensuring nothing left behind, the camera auto-rotates to cover more details with its 3K lens. With unrivaled responsiveness upon human motion and loud noise, the camera further leaps forward for the future of automation. In addition to advanced security functionality, it also innovatively introduces a touch call button to keep you connected to your family.

Get the notifications that matter

A lot of activities go on inside your home. Don't want to get alerted repeatedly when your curtains flutter in the wind? The H6c Pro is smart enough to identify human activities in particular. You can choose to get alerted only when somebody is detected on camera.

Smart enough to detect, zoom, and follow

The camera can automatically zoom in up to 4 times to follow a moving person so you see details and get the whole picture at the same time. You can always enable the AI option to detect and track specifically human movements.

It takes care of the whole family

It's important to know if you're needed by your loved ones. The camera alerts you if the noise level suddenly changes – whether your baby cries or a siren blares. In addition, they can contact you from the camera's side by simply tapping the call button - one of the easiest way to make a video call.

Enhanced viewing pleasure with smaller video files

Compared to the prevailing H.264 video compression technology, H.265 creates a more fluid viewing experience with recorded videos. Meanwhile, you won't have to worry about large video files taking up too much of your storage space – H.265 technology reduces their sizes by up to 50%[3].

1 You will need to choose the Wi-Fi frequency band during the device setup process. Once the choice is made, you will not be able to change it to another frequency band.

2 Local storage cards must be purchased separately. Cloud storage service is only available in certain market regions. Please verify availability before making a purchase.

3 Data from EZVIZ Lab's test results under standard conditions. The video compression efficiency will vary with the frequency and complexity of the activity captured, as well as other environmental factors.
