24 MONTH WARRANTY

G-SPEAK ULTRA

The **G-SPEAK ULTRA** promotes the ultimate in convenience and peace of mind by combining wireless GSM technology with CENTURION's futuristic and stylish ULTRA interface.

Infused with the DNA of innovation, the **G-SPEAK ULTRA** allows wireless communication between the user and the intercom gate station, meaning that you can answer your intercom from anywhere which isn't only convenient, but deters burglars and intruders.

FEATURES AND BENEFITS

Wireless convenience

You know how people are always saying 'less is more'? Well, when it comes to less wiring, we believe that less is less: less money, less time and less effort, that is! With the **G-SPEAK ULTRA** 4G GSM-based intercom system, your mobile phone acts as the intercom handset so there is no need for expensive cable runs back to the house or office.

Up the security ante

With the **G-SPEAK ULTRA** system, you can answer your intercom from anywhere in the world¹, giving the appearance that you are home even when you are out and about. This greatly enhances security and acts as a deterrent to would-be intruders. In addition, only learned-in, authorised phones are able to access the system.

PLUS! Remotely monitor activity on your **G-SPEAK ULTRA** by viewing transaction logs online or downloading them onto your computer with CENTURION's convenient and user-friendly web interface, **G-WEB PLUS**.

Open your gate from anywhere

The **G-SPEAK ULTRA** system offers up to 1500 users the ability to open an entrance gate from anywhere in the world via the G-REMOTE mobile app or your phone's keypad. You don't need to compromise the security of your home by giving your garden services or repair personnel keys or remotes; you can give them limited access even if you're chilling on a beach in the Bahamas! The new and improved **G-WEB PLUS** online interface makes it easier than ever before to suspend and enable users, taking all the hassle out of user administration. You are firmly in control.

Control and Monitor

With the **G-SPEAK ULTRA**, we're giving you the ability to monitor and control up to four channels, independently configurable as either inputs or outputs.

Receive push notifications on your mobile of events such as¹:

- Gate left open
- Infrared gate safety beams obstructed for unusual length of time
- Alarm activated
- Mains power failed

Control up to four different devices via using the **G-REMOTE** app¹:

- Open your gate/garage from anywhere in the world
- Switch a pool pump on or off
- Control a generator
- Activate irrigation systems
- Switch on lights
- Arm an alarm

Outputs can be configured as either pulsed or latching, with user-specified pulse times for even more flexibility.

Easy and secure setup

Your new or existing **G-SPEAK ULTRA** intercom system can be easily administered via the **G-WEB** website or mobile app. Add, delete and edit authorised users and select which **G-SPEAK ULTRA** functions they can use, load airtime and configure the inputs and outputs.

When you choose **G-SPEAK ULTRA**, you also get access to CENTURION's web interface, **G-WEB PLUS**, which means managing all your devices from the comfort of your home or office, PLUS:

- Remotely change settings such as passwords; call, ring and hang times; channel settings, Voice and Switch Numbers
- Receive firmware update notifications and update firmware over-the-air
- Monitor network balances, power supply voltage and signal strength
- View diagnostics and event logs
- Set up timed auto-activations
- Add, delete, suspend users and administer their profiles

G-WEB is now also available as a free mobile app! Download G-WEB on your smartphone and give your clients on-the-go service with easy management of ULTRA devices from anywhere. You can add, delete and edit devices, set up functionality and manage access numbers whether you're onsite or on the road.

Easy access to diagnostics

This smart device provides intelligent feedback via a graphic user interface displaying status, system information and diagnostic messages for the complete ULTRA experience.

Your voice will be heard!

And so will the voices of your visitors! **G-SPEAK ULTRA** delivers crystal-clear speech quality thanks to state-of-the-art GSM audio technology. **G-SPEAK ULTRA** gives you incredible flexibility with adjustable volume as well as configurable call, ring and hang times.

Intelligent monitoring of gate status

With the **G-SPEAK ULTRA**, your peace of mind is not dependent on physical proximity, and the rules of physics can be bent so that it's almost like you're two places at once. With seamless integration with CENTURION gate motors, your **G-SPEAK ULTRA** will let you know when your gate has been left open, or is in any other state specified by you through intelligent monitoring of the gate motor's status output. Adjustable Filter settings mean that you can specify under which conditions you are notified about a particular gate status, for example if the gate has remained open for longer than 20 seconds.

Security, meet convenience

For even more security, flexibility and control, use the built-in Weekly and Visitor Access Modes to control access right down to the minute!

Timed Access Control

(Weekly and Visitor) Set arrival and departure dates and times; guests will only be able to activate the device's outputs between these limits, giving you maximum security and affording your guests maximum convenience. As a special value-add developed specifically with B & B owners in mind, customised arrival and departure messages with welcoming messages, access instructions, etc., can be sent automatically to guests and visitors.

Alternatively, set weekly recurring time-periods (for example 8am to 5pm, Monday to Friday) during which users will have access to the system. Outside of the configured time-periods, access will be denied. Add the ability to map inputs to outputs, customise the input and output notification messages and use the **G-SPEAK ULTRA** in advanced applications, such as industrial fridge/freezer temperature monitoring, and you have a powerful and convenient GSM-based monitoring and control solution. Up to 20 separate text messages with up to five scheduled outputs can be configured.

Time barring windows can be configured to block notifications, activations or specific access numbers. In addition, Each call button can be individually time-barred. For example, the primary button can be time-barred so that only the secondary call button works during the evenings or early in the morning while the primary call button is disabled.

1. Certain functionality may require additional interface devices such as relays, isolators, etc.

Revolutionising automation with auto-activation scheduling

The **G-SPEAK ULTRA** boasts a built-in 7-day timer that enables you to easily set up multiple, recurring automatic output activations for any time on any day of the week. Simply log into G-WEB PLUS and schedule your entire week's activations. The **G-SPEAK ULTRA** will take care of the rest.

Set up schedules to automatically activate:

- Gate automation systems
- Pool pumps
- Lights
- Irrigation systems
- Roller-shutter doors

PLEASE NOTE

There will be no transaction costs when the G-ULTRA unit is controlled using the G-REMOTE app only, as the product SIM card offers free data for the life of the product; however if SMS notifications are used, applicable rates that can be found on the G-WEB platform. The G-SPEAK ULTRA GSM intercom system will also require airtime to be loaded to enable voice communication; again, this can be done via the G-WEB online interface.

Always connected

You get free data for the life of the product! No more running out of data. No more hassles. Just always-on ULTRA convenience when using the G-REMOTE app.

Free app functionality

Using the G-REMOTE app for monitoring and control won't cost you a thing with free activations and notifications.

Simple airtime and SMS balance display

The revamped and simplified balance view will give you an accurate, intuitive and easy-to-understand breakdown of your voice and SMS balances.

Low token notification

You'll always know when you're running low - thanks to low threshold notifications for voice and SMS balances pushed directly to your phone.

UNLEASH THE POWER OF THE ULTRA RANGE WITH THE G-REMOTE APP

G-REMOTE

Experience complete convenience and control with the **G-REMOTE** mobile application, an intuitive command centre to monitor and activate your CENTURION GSM devices using only your smartphone.

- Unbelievably cost-effective monitoring and control solution
- Activate device outputs with a single tap
- Choose from a range of custom icons to represent the functionality associated with each button
- Personalise your **G-REMOTE** experience by customising button colours and assigning unique tones for each device linked to a profile
- **G-REMOTE** comes with built-in text-to-speech functionality
- Device monitoring via push notifications with the ability to block notifications for each individual phone
- The **G-REMOTE** app boasts a dedicated screen displaying critical system information such as airtime balances and device signal strength
- Visible IOs can be configured for each Access Profile
- Each **G-REMOTE** instance can have access to multiple devices

TECHNICAL SPECIFICATIONS

G-SPEAK ULTRA	
Supply Voltage Range	11-24V DC
Maximum Current Draw	300mA @ 12V DC
Input/output Current Rating	50mA (Open Collector)
Input Sense Voltage Range	0-24V DC (0-1.6V Low-input State, 5V-24V High-input State)
SIM Card	Micro-format, Activated MTN® SIM Card Supplied ^{1,2}
Number of Configurable Input/output Channels	4
Call Buttons on Calling Module	2
Call confirmation at Calling Module	Yes
Speech volume	Adjustable at Calling Module using Call Buttons
Calling Module illumination	Call Buttons and labels with back-lit white LEDs
Memory Capacity	<ul style="list-style-type: none"> • 1500 Access numbers • 5000 Event logs • 20 Access Profiles • 1 Custom Welcoming SMS Message for New Access Numbers • 20 Custom Output Activation SMS Messages (From User to Device) • 30 Custom Input Notification SMS/Email Messages (From Device to User) • 100 Visitor Time-barring Windows (Windows are the periods between two dates) • 30 Generic Time-barring Windows (Windows are weekly recurring) • 10 Output Activation Schedules (Schedules are weekly recurring) • 3 Daylight Saving Periods • 4 Input to Output Mapping Configurations
Model Options	<p>GSM 2G: 850/900/1800/1900MHz (EDGE)</p> <p>GSM 3G: 900/2100MHz (EDGE) 900/2100MHz (UMTS)</p> <p>GSM 3G PENTA: 800/850/900/1900/2100MHz (UMTS)</p> <p>GSM 4G/LTE-CAT1: 900/2100MHz</p>

1. May not be used in devices other than **G-SPEAK ULTRA**.
2. Remains the property of Centurion Systems (Pty) Ltd.

USER EXAMPLES

Simple, effortless dialling to dedicated numbers - easy to use and prevents abuse.

Ideal for:

- Small children to reach their parents
- Elderly persons to reach their children and care-givers
- Warehouse receiving areas
- B & Bs and guesthouses

Devices that can be monitored via the inputs

- House alarm: activated
- Electric fence: alarm triggered
- Geyser status: On/Off
- Mains power: On/Off
- Fridge aboard your boat: On/Off
- Borehole pump status: Running/Off
- Water reservoir: Full/Empty
- Entrance gate status: Open/Pedestrian

Devices that can be controlled via the outputs

- Automated entrance gates
- Geysers
- Appliances, e.g. the fridge aboard your boat
- Air conditioners
- Borehole pumps
- Lighting systems
- Irrigation and water features
- Alarm systems
